Sustainable Agriculture Practices

About the Estate:

Chateau de ROUILLAC is a stunning 36 Ha. (86.76 acres) single estate, located in Canéjan - touching Bordeaux city - and heart of the prestigious Pessac-Léognan Appellation . Recently acquired in 2009, by Laurent & Sophie CISTEROS, with the wish to take over the course of history, the one of Baron Haussmann - famous 19th century architect who transformed Paris architecture - but also real builder, man of horses and previous owner of ROUILLAC. He then built a magnificent charterhouse and stables, regularly inviting at his place & table, the Emperor Napoleon III.

Laurent & Sophie CISTEROS, immediately invested on purpose to get the best results and wines from this unique place and gravelly terroir; they reintroduced work with draft horses and completely eliminated any herbicides. Proper investments in cellars' new equipment, perfect oak barrels, and the precious help and assistance of Eric Boissenot (consultant oenologist at Ch. Margaux, Latour, Laffite-Rothschild). 2011 is their 1st 100% "own vintage (culture & vinification) and every year since then, it is impressively better!

DADA (Horsie), is not a 2nd label, it is a pure gem from specific blend and vines, making the wines fruity, fresh, gourmet, without loosing or hiding this great Appellation character and raciness. DADA wines are a pure passion creation, inviting to conviviality

Tasting Notes:

Bright, ripe and so lively wine and nose, with a unique aromatic complexity on flint, graphite, wax, grapefruits and lime tree notes. Racy, ample and fleshy palate and length. Superb!

Press Review:

Soon to come.
